Course Details

Welcome to Linux Academy's all new AWS Certified Machine Learning - Specialty prep course. This course prepares you to take the AWS Certified Machine Learning - Specialty (MLS-C01) certification exam. It also gives you the hands-on experience required to use machine learning and deep learning in a real-world environment.

This course starts off with coming to grips with Machine Learning (ML), Deep Learning (DL), and Artificial Intelligence (AI) terminology. After the theory comes the practice. You'll get hands-on with a number of ML frameworks and AWS services specific to the certification.

Course code and other resources can be found here:
